SCIENTIFIC INFORMATION

RECIPIENTS OF THE COURSE

Nurses, surgeons, physiotherapists, medical radiology technicians, neurology technician, auxilliary healthworkers.

AIM OF THE COURSE

"Nursing Round" is a nursing procedure that involves all the clinical activities performed on the patient.

The training course is aimed at operating-room personnel (nurses), physiotherapists and radiology technicians that already have experience in this sector of spinal surgery. Open to outsiders, both lecturers and students, the training includes academic and practical sections with a final examination. An integral and fundamental part of the theoretical session of the course "Nursing Round" is the "live" transmission of surgical procedures from the operating room via an audio-video link to the lecture hall. This will allow real time participation of the various phases of surgical intervention and discussion with the surgical team.

As a result of the strong collaboration between the multi-disciplinary team of surgeons, nurses and radiology technicians, the course offers these health working professionals dedicated to the well-being of the spinal surgery patient, the opportunity to exchange ideas and experiences with regard to resolving errors in clinical practice.

ABSTRACT PRESENTATION

The programme of the course includes time for contributions from participants who wish to submit abstracts inherent to the course topics. The abstracts will be selected by the scientific segretariat and those chosen will be included in the programme as scientific reports within the teoretical sessions.

Contributions should be sent in the form of abstracts and typed in text editor Microsoft Word type, they must not exceed 3000 characters, and must clearly contain the title of the presentation, the authors and must be structured thus: introduction, presentation of case, discussion.

The contribution should be sent as an attached file to the following-mail addresses

annamaria.nicolini@ior.it
